

/home/boa/CLionProjects
/word_counter/command
_handler/include/count
_occurrences_word_command.hpp

```
graph BT; A["/home/boa/CLionProjects  
/word_counter/command  
_handler/src/count_occurrences_word_command.cpp"] --> C["/home/boa/CLionProjects  
/word_counter/command  
_handler/include/count  
_occurrences_word_command.hpp"]; B["/home/boa/CLionProjects  
/word_counter/command  
_handler/src/invoker.cpp"] --> C;
```

The diagram illustrates the relationship between three source files in a C++ project. At the top is a header file, `count_occurrences_word_command.hpp`, located at `/home/boa/CLionProjects/word_counter/command_handler/include/`. Below it are two source files. The file on the left, `count_occurrences_word_command.cpp`, is located at `/home/boa/CLionProjects/word_counter/command_handler/src/` and includes the header file. The file on the right, `invoker.cpp`, is also located at `/home/boa/CLionProjects/word_counter/command_handler/src/` and includes the same header file. Blue arrows point from each source file to the header file, indicating the include relationship.
